Reissue Provisions

I believe the original patent to be wholly or partly inoperative for the reason the patentee claimed less than the patentee had the right to claim in the patent. This is a statutory basis for reissue as recited in 35 U.S.C. §251.

The at least one error upon which reissue is based is described as follows:

The patent describes starting at column 16, line 32 through column 19, line 2 other modes and embodiments of the inventions described for which claims were not included in the patent. In particular, the specification describes a special or showdown round concept not claimed in the patent. This absence of claims directed to these modes and embodiments make the patent wholly or partly inoperative by claiming less than the patentee had a right to claim.

All errors being corrected in this reissue application arose without any deceptive intention on the part of the applicant.
